Profile

I am Abdelrahman Khaled, an enthusiastic student pursuing my education in the dynamic realm of Computers and Artificial Intelligence. Alongside my academic endeavors, I thrive in the world of technology as a proficient front-end developer, where I sculpt digital experiences with creativity and precision. My journey as a front-end developer has been enriched by my involvement in diverse freelance projects. Through platforms like Upwork, I've had the privilege to collaborate with clients from various backgrounds, delivering tailored solutions that exceed expectations. With a commendable 100% work success rate, I take pride in my ability to translate vision into reality, one pixel at a time. Beyond the lines of code, I am a proactive learner, continuously seeking to expand my skill set and deepen my understanding of emerging technologies. I am fueled by the belief that every challenge is an invitation to grow, and every success is a testament to perseverance and dedication.

- GitHub

Professional Experience

Front end Developer

2023/07 – present

Upwork 

I work as a freelancer on the Upwork platform .Worked on real projects in a collaborative team environment. Converted Figma designs into functional code, created forms, and handled API requests. Developed a strong understanding of web application development. Showcased a commitment to excellence and dedication to delivering high-quality work.

Projects

E-Commerce Complex

2024 – 2024/02

Complex is an innovative e-commerce platform designed to revolutionize your online shopping experience. Built with React for a sleek front-end and Laravel for a robust back-end, Complex combines the best of modern technology and user-centric design. With its fully responsive interface, you can shop seamlessly across all devices.

Dashboard

2023/12 – 2024/02

This e-commerce dashboard is designed to provide a comprehensive overview of sales, inventory, and customer data. It features a user-friendly interface, it allows you to monitor transaction and the status of each order, and it empowers you to efficiently manage and analyze the core aspects of your e-commerce business.

Movix

2023/05 – 2023/06

Movie App, a sleek and user-friendly web application built on React, powered by the TMDB API, and enhanced with a plethora of tools and libraries. With Redux/toolkit for seamless state management and Axios for efficient API requests, Movie App delivers a seamless browsing experience. Effortlessly search for your favorite films by title, delve into detailed movie information, and even watch trailers with React-player integration. Experience smooth performance with loading progress indicators, while our responsive design ensures optimal viewing across various devices. With React-circular-progressbar, React-icons, and React-lazy-load-image-component enhancing the interface, Movie App offers an immersive and dynamic cinematic exploration.

Accounting Office

2023/01 – 2023/02

Discover our accounting office's responsive website, designed for easy navigation and aesthetic appeal. Explore our range of services, from tax preparation to financial consulting, detailed across our Home, About Us, and Services pages. Connect with us effortlessly through our Contact page, including WhatsApp communication options. Experience seamless browsing with technologies like HTML, CSS, JavaScript, Bootstrap5, and enhanced with Wow.js, Email.js, and Sweetalert2.

APEX

2023/01 – 2023/01

Apex is built using cutting-edge technologies like Bootstrap 5, HTML5, and CSS3. All the major browsers are supported by this highly compatible template. The responsive template has a well-designed layout and is optimized for page speed. All the UI components are user-friendly and will keep people on the site for much longer. Moreover, as this template comes with geolocation, you'll be able to show the users your exact location and help them find you easily.

Education

Student

2021/09 – present
Cairo, Egypt

Faculty of computers and artificial intelligence, Helwan University
